

ABSTRACT OF THE DISCLOSURE

An electronic camera recording/playback apparatus operable to both shoot a subject and edit shot data. The apparatus
5 comprises a main unit and a display unit for displaying a shot image or an edited image, and the display unit is able to take plural attitudes to the main unit which are: a closed attitude in which a display screen of the display unit confronts the side surface of the main unit, and the rear surface of the display
10 unit is exposed; a shooting attitude in which the display unit is released from the side surface of the main unit; and an editing attitude in which the display screen of the display unit is parallel to the side surface of the main unit and is exposed.
Therefore, it is possible to provide an electronic camera
15 recording/playback apparatus which is simple to operate and which enables shooting and editing of shot data.
